### Trade Lead Detail

#### Trade Lead Description

The Forestry Commission, hereafter referred to as the FC, wish to establish a contractual solution for the provision of Human Resources (HR) and Payroll Information Management System services.

The solution will replace our current integrated HR/Payroll IT system and existing arrangements, and will take advantage of modern HR systems technology to incorporate support for new HR processes, streamline our existing HR processes and offer enhanced business information.

This system is regarded as critical to the operation of the FC's business. Solutions offered should therefore minimise cost whilst maintaining a high-quality service. The FC are currently undecided whether this will be best achieved through an internal or external hosting option. Consequently the FC are open to examining the following options:

Option 1 Software package only (i.e. application hosted by the FC).

Option 2 Software package and application hosting service.

Option 3 Fully managed out-sourced service (including all aspects of system management and payroll processing).

Suppliers are invited to tender for one or more of these options, which are more fully described in section 8.

This exercise will look to select the most economically advantageous tender for each delivery option. All tenders for each delivery option proposed will be evaluated. Thereafter, selection of the most appropriate delivery option will be a separate decision, based on overall cost to the organisation and risks and benefits of implementation and delivery. This means that even if a supplier is selected as the most economically advantageous tender for any one of the above options, this will not constitute any contractual relationship, or a commitment to proceed to a contractual arrangement in respect of that particular option.

### Trade Lead Detail

#### Trade Lead Description

Sunderland City Council is seeking expressions of interest from providers of off the shelf Parking Enforcement Systems and associated software licences, hardware, installation and implementation services in support of the Council's responsibilities for Civil Parking Enforcement under the Traffic Management Act of 2004 (as amended). The Council is yet to determine what the hosting arrangements will be and therefore will require a range of pricing options. This procurement is for a fully operational system, software licences, hardware, installation and implementation services, together with on going maintenance and support, to process penalty charge notices (PCNs), permits and related items. The Council wishes to explore the options for both a) in house based hosting of the system(s) and also a supplier fully hosted based service.
